DEPARTMENT OF CIVIL ENGINEERING

A GUEST LECTURE ON DETAILING OF RCC STRUCTURES

The Department of Civil Engineering in association with the Professional Society of Indian Concrete Institute at NEC, Gudur organised a guest lecture on the topic, “**Detailing of RCC Structures**” for the Civil Engineering students on February 24th, 2021. The speaker invited to deliver the talk was **Mr. S.Vijaya Bhaskar**, Senior Structural Engineer in **UBE Industries Limited, Hyderabad**. The session commenced at 10.30 am in the Seminar Hall of the Civil Engineering Department.

The Welcome Address was delivered by Prof.K.Yugandhar Reddy, Head, Department of Civil Engineering.

The Speaker initiated his talk by outlining the topics that would prove inevitably essential for civil engineers at workplace. He detailed the project criteria pertaining to construction site, use of materials and limitations. With impeccable eloquence, he portrayed the erection process, function and working mechanism of RCC. He explained the detailing of RCC structures like columns, beams, slabs etc.

As the session culminated, the Guest was presented a memento by the Head of Civil Engineering Department. The session concluded at 12.50 pm with the National Anthem. Total 23 students from 3rd civil and all faculty members were attended to this session. At the end of the assembly, the students were well satisfied with the information that was shared.

The programme was organized by the in charge of Professional Society Chapter, Mr.J.Surya Narayana, Assistant Professor, Dept of Civil Engineering.
